# Your Office. Anywhere.

Work anywhere, any time... Seamlessly.

## With our hosted voice service, your office can do more...from anywhere.

Any phone system can route calls between people in your company, but only our Hosted Digital Voice Service gives you the flexibility to run your business from anywhere with:

- **Simpler, more efficient communication**
- **No upfront costs**
- **No maintenance costs**

**It's time to upgrade to hosted voice.**

### Can Your Phone System Do This?

Your Phone 

Swap calls between your cell and your desk phone	<input type="checkbox"/>	<input checked="" type="checkbox"/>
One number rings your office, home, cell and up to 8 other devices	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Read or listen to voicemails in your email inbox	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Click-to-call any contact in Outlook, Salesforce.com, ACT!, etc.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Integrated with Smart Phones, Tablets and 4G wireless networks	<input type="checkbox"/>	<input checked="" type="checkbox"/>

# Hosted Digital Voice Service

Unified Communications or UC for short, is a new way communicate. By seamlessly integrating your phone services with your online communication and company data, you become more efficient, and your customers get a better experience.

Services like conferencing, collaboration, voice mail, instant messaging, email, calendars, contact lists and more can interact with each other - no more silos of data.

With UC, the boundaries between modes of communication blur both technically, and functionally. With UC, you can answer your desk phone from the cabin, the airport or home office. No matter where, when, or how you communicate, you have seamless, consistent access to the same familiar interfaces and resources.

Best of all this system requires no hardware purchase or maintenance, and all feature upgrades are included.

## 100% Control, 0 CapEx

- Since the Hosted Digital Voice system is cloud-based, there are no large CapEx requirements, and no complex on-site hardware
- No oversizing required - you can always add or remove seats as your business changes
- All software upgrades are free - your system is never out of date
- Save time with Unified Communications: email, phone and more are all linked so responding is simple regardless of how you received the message

## Benefits of Hosted Digital Voice Services:

- Make calls from your desk phone, mobile phone and computer with identical functionality from each device
- Your team will have everything at their finger tips, regardless of where they are... calendar, contact lists, conferencing and more
- Transferring calls to team members is as easy as dragging and dropping to a user - there's no need to know where your folks are - the system will find them
- Scalability - adding features is quick and easy, and can be done yourself
- Take your desk phone anywhere with an Internet connection and it will appear that you are in your office
- One mailbox for your emails/voicemails/faxes
- Click to dial from Outlook or corporate phone book
- Managing your features, users and process is fully customizable by you - you can make changes quickly at no cost
- Disaster recovery - calls can be routed anywhere and equipment is easily procured... before your customers know
